The community areas.

To get to know each other, relax and communicate: Uni Apart indoor and outdoor lounge, gym and laundry, drying room.

The house

The entire student apartment block has a well thought-out energy-saving concept that extends to the smallest details, such as energy-saving light bulbs. The use of climate-neutral gas is a matter of course. Our PV system is also fully installed and active. With its almost 100 kWp, this is an impressive example of our commitment to renewable energy and sustainability. With such a capacity, a considerable amount of clean electricity can be generated, which not only covers our own energy needs, but also has a positive impact on the environment. This means that you can now obtain your green electricity directly from your own roof.
The central technical property management team coordinates enquiries from residents and takes care of repair and maintenance tasks on site. Caretakers as well as all cleaning staff and administrative staff are employed directly by Uni Apart. This means you don't have to rely on external companies for these tasks - a real quality feature.
